

Earth Citizen Politician's Accountability Agreement (UK)

As a candidate for, or Member of the..... Parliament/Assembly I **hereby hold myself accountable for tackling the systemic root causes of global challenges through Global People Power's participative democratic process.**

If I am elected, I will take action to implement Earth-Citizens' Assembly (ECA) policies to tackle global challenges immediately and unilaterally where possible, or, where necessary, to set a date to commence with the process of their global cooperative implementation.

1. Support and fund national (UK) ECAs. National ECAs will propose policies to tackle global problems. These are policies considered to be safe for their nation to implement immediately and unilaterally (Policies A). They will also announce to the nation which policies they consider to be unsafe to implement unilaterally (Policies B) and would therefore require global cooperative implementation.
2. Support and fund Global ECAs attended by citizens from around the world who will propose ECA's Global Policy Packages (Policies B).
3. Once the ECA's 1st Global Policy Package has been proposed, each nation will commence with a public process of informed, nuanced deliberation resulting finally in a national referendum vote. National citizens will choose from a list:
 - a. Their preferred ECA's Global Policy Package (Policies B).
 - b. None of the above but with multiple-choice options for renegotiation.
 - c. No to cooperating globally.

I will encourage members of my party to sign the agreement as part of our party policy.

If I revoke my agreement I will inform Global People Power and those whom I represent.

I am signing Global People Power's Accountability Agreement as an individual, not on behalf of my party.

Open statement in support of Global People Power:
